# TrimLine<sup>®</sup> Anterior Cervical Discectomy & Fusion Instrument Set

A comprehensive color coded, streamlined cervical instrument set designed specifically for ACDF procedures.

## Anterior Cervical Discectomy and Fusion Instrument Set

The TrimLine ACDF Instrument Set has been designed specifically for standard cervical anterior approaches, discectomies, and fusions. It includes instruments necessary to perform the cervical exposure, decompression, graft harvest, and placement. Instruments are color coded to simplify identification and this feature allows the procedure to run more smoothly. Instruments can be purchased separately or as part of the TrimLine Set.

### Kerrisons

- Color coded handles to differentiate sizes
- Hand polished cutting surfaces to help maintain sharp edges
- Fully machined components to enhance product consistency

### Hand-Held Retractors

- Aluminum blades for better imaging
- Ergonomically designed handles

## Graft Placement Instruments

- Can be used with autograft or allograft
- Holder/Introducer will not leave a hole in the graft
- Ergonomically designed handles

### Self-Retaining Retractors

- Generic blade for use with either fixed or rotating modular blade handles
- Modular blade handles can be removed after retractor frame is added
- Improved side-loading connection mechanism
- Radiolucent blades to enhance imaging

## Curettes

- Color coded handles to differentiate sizes
- Hand polished cutting surfaces to help maintain sharp edges
- Fully machined components to enhance product consistency

## Pin Distraction Set

- Universally acceptable instruments
- Improved pin strength
- Right and left options
